

ATTENDANCE QUIZ (FUNCTIONS AND LIMITS)

COLTON GRAINGER (MATH 1300)

Print your **name** and **three digit section number** in the top right corner, attempt¹ the problems, and return this page to me. Your answers do not count towards your final grade, but your attendance does. You have about 2 minutes a question.

- Consider the function $f(x) := x^2 + 1$. What is the polynomial describing $f(f(x))$?

(A) $x^2 + 2$
(B) $x^4 + x^2 + 1$
(C) $x^4 + x^2 + 2$
(D) $x^4 + 2x^2 + 1$
(E) $x^4 + 2x^2 + 2$

- If $f(g(x)) = 5$ and $f(x) = x + 3$ for all real x , then $g(x) =$

(A) $x - 3$
(B) $3 - x$
(C) $\frac{5}{x+3}$
(D) 2
(E) 8

- For all positive functions f and g of the real variable x , let \sim be a relation defined by

$$f \sim g \text{ if and only if } \lim_{x \rightarrow \infty} \frac{f(x)}{g(x)} = 1.$$

Which of the following is NOT a consequence of $f \sim g$?

(A) $f^2 \sim g^2$
(B) $\sqrt{f} \sim \sqrt{g}$
(C) $e^f \sim e^g$
(D) $f + g \sim 2g$
(E) $g \sim f$
